Janathan Janacek Certified Graduate Remodelor Designation

Rogers, AR – Jonathan Janacek, of Janacek Construction of Rogers, AR, recently received the designation of Certified Graduate Remodelor (CGR). The CGR designation requires that the graduate meets prescribed standards of business practice, possess a minimum of five years remodeling industry experience, have a proven track record of successful project management, complete a comprehensive education curriculum, and pledge to uphold the program's code of ethics. Jonathan is the third remodelor in the state to earn the designation and only the second Certified Graduate Remodelor in Northwest Arkansas; The first Tim Janacek, president of Janacek Construction.

“We believe that continuing education courses help keep us on the cutting edge of our industry,” said Jonathan. “No matter how much experience you have there is always room to learn more and move into new technology.”

Jonathan has brought computer aided design into the company and often “wows” clients with not only easily changeable plans, but also 3-dimensional renderings of what their project will look like.

“The ability to show clients their project before we build is priceless,” said Janacek. “It saves both the client and us a bundle in time and change orders.”

The CGR course and designation is provided and earned through the National Association of Home Builders (NAHB). NAHB offers these courses to professionals as a way to improve skills and prove their commitment to professional growth.

In addition to the CGR designation, Janacek also holds the designation of Certified Aging-in-Place Specialist (CAPS). This designation program teaches the technical, business management, and customer service skills essential to competing in the fastest growing segment of the residential remodeling industry: home modifications for the aging-in-place. With his knowledge in this area Tim can help clients determine what can be planned into new construction or remodels that will enable the client to remain in their home as they grow older. These plans might include simple modifications such as building a new home with wider hallways that might accommodate a future wheel chair, to simply adding ramps and additional lighting.

Janacek Construction routinely handles kitchen and bath remodels, room additions, deck and garage construction and ground up custom home construction. Janacek Construction is made up of an experienced team skilled in all areas of remodeling and construction. They handle all phases of a project from framing to drywall, roofing to painting and

electrical to plumbing. They are known for their professionalism, courtesy and attention to detail.

Janacek Construction of Rogers serves all of Northwest Arkansas. For more information visit their web site at www.janacekconstruction.com or call 479-621-0565.
