Tim Janacek Receives Graduate Master Builder Designation

Rogers, AR – Tim Janacek, President of Janacek Construction of Rogers, AR, recently received the designation of Graduate Master Builder (GMB). The Graduate Master Builder designation is reserved for those construction professionals who have had many years of experience and have completed advanced, in-depth instruction in the building business.

In addition to the Graduate Master Builder designation, Tim also is a Certified Graduate Remodelor (CGR) and has 20 years of experience in new construction and remodeling. Tim is the only active contractor in Arkansas to hold the Graduate Master Builder designation and only the second in the state to hold the Certified Graduate Remodelor designation, and the only CGR in Northwest Arkansas.

The GMB and CGR courses and designations are provided and earned through the National Association of Home Builders (NAHB). NAHB offers these courses to professionals as a way to improve skills and prove their commitment to professional growth.

In addition to the GMB and CGR designations, Janacek also holds the designation of Certified Aging-in-Place Specialist (CAPS). This designation program teaches the technical, business management, and customer service skills essential to competing in the fastest growing segment of the residential remodeling industry: home modifications for the aging-in-place. With his knowledge in this area Tim can help clients determine what can be planned into new construction or remodels that will enable the client to remain in their home as they grow older. These plans might include simple modifications such as building a new home with wider hallways that might accommodate a future wheel chair, to simply adding ramps and additional lighting.

“My wife Jeanette and I have made trips all over the nation so that I could take the classes required for various certifications. I have been very impressed with the quality of both the faculty and the curriculum,” said Janacek. “Jeanette runs the office for the company. I couldn’t do it without her.”

Janacek Construction routinely handles kitchen and bath remodels, room additions, deck and garage construction and ground up custom home construction. Janacek Construction is made up of an experienced team skilled in all areas of remodeling and construction. They handle all phases of a project from framing to drywall, roofing to painting and

electrical to plumbing. They are known for their professionalism, courtesy and attention to detail.

“Jonathan has added some new technology to the company. We now offer computer design and the ability to show clients what their project will look like in three dimensions,” Janacek said of his son, Jonathan. “It has been an excellent tool for us.”

Janacek Construction of Rogers serves all of Northwest Arkansas. For more information visit their web site at www.janacekconstruction.com or call 479-621-0565.
